

Qatar-Spain Innovation Programme (QASIP) Partner Search

A. Qatar-based company seeking Spanish company partner

If you are a Qatar-based company seeking a suitable partner in Spain to participate in the QASIP Programme, please provide the information about your request below. QRDI will connect with Spain's Centre for Development in Technology and Innovation (CDTI) to search for suitable companies that could be potential partners and introduce them to you. Please connect with these companies to explore working together. Once you have identified a suitable partner, you will be able to apply for the QASIP grant.

The respondent's email (raufsta@hotmail.com) was recorded on submission of this form.

Company Information

Company name *

Cybergy-Tech

Date of request *

18th May 2023

Company website *

www.cybergy-tech.com

Contact person and designation *

Ahmed Rauf- Founder and Director

E-mail *

raufsta@hotmail.com

Phone number *

+974 5536 3658

Mobile number *

+974 6007 4060

Company Profile**Business sector ***

Oil and Gas, Technology

Nature of business (100 words) *

We bring digital solutions to the oil and gas industry. We are developing a digital rig that includes RFID-tag based inventory & certification management, maintenance organization, and safety records. We aim to deliver further analytics and optimization to rig operations through use of our solution including through the use of data science, machine learning algorithms and dashboards. This will deliver cost savings in terms of efficient levels of inventory, spares optimization, reduction of downtime and safer operations.

Date of establishment *

2021

Total number of employees *

5

Total number of employees in R&D *

3

Technical competencies and expertise *

Rig operations, software development, maintenance optimization, inventory management

Existing R&D projects (if any) *

The digital rig an R&D project

Brief description of potential collaborative project(s) *

A collaboration where we could arrange a pilot of our digital rig in an industrial warehouse/rig in Spain
A technological collaboration in which we can arrange a partner for the hardware components of our solution, mainly the RFID tags and RFID readers (with Android software) that can be programmed to our platform

Areas of collaboration sought *

Pilot project support in Spanish energy companies
RFID scanners and chips hardware support

Any other information to be shared with potential partner *

We are open to equity sharing , JV

Any other information to be shared with potential partner *

Our initial product is ready to be trialled, we are looking for improvements to our hardware (RFID scanners that are explosion proof android devices)

Potential Partner Company Profile**Business sector ***

Energy, oil and gas, technology, logistics

Technical competencies and expertise *

Industrial hardware (explosion proof), logistics/warehousing, RFID chips and scanners, data science, programmers, oil and gas industry knowledge

Other important competencies *

Oil and gas industry knowledge or exposure
Inventory management exposure

Other characteristics of the 'ideal' partner *

Has extensive network in oil and gas sector
Has technological expertise (data scientists, programmers)
Have inventory management, logistics or warehouse expertise (RFID, scanners etc.)
